

Mistral Power Washing Equipment

FORECOURT VEHICLE WASHER

Designed for Garage Forecourts, and Fleet Washing, either to raise revenue or for the convenience of the staff.

Mounted in a free standing, frost protected, stainless steel cabinet, bolted to the ground, and fitted with a locking door which prevents theft and unauthorised tampering. Machine settings and the detergents are all secured inside the locked cabinet.

This is a fully programmed machine which can be operated by tokens, buttons, or coded keypad with up to three preset timed programmes (see below):

- The system initially supplies a cold water high pressure rinse for washing away dirt and mud.
- Then a hot water chemical mix, which actively dissolves dirt and grease.
- Then a high pressure rinse to clean off the grease and chemical.
- Followed by a wax rinse (optional)
- All times can be preset to suit the customers application to ensure an effective and rapid wash

The preset timed programmes typically operate as follows:-

- 1 High Pressure Pre-Rinse (Typically 2.5 mins.)
* Buzzer Sounds
- 2 Hot Detergent Application (Typically 1.5 mins.)
* Buzzer Sounds
- 3 High Pressure Wash (Typically 3 mins.)
* Buzzer Sounds
- 4 Wax Rinse Application (Typically 1 mins.)
* Buzzer Sounds

Technical Specification				
Model	Power	Flow	Voltage	Motor
1500SVW	1450 psi./100 bar	13 lpm.	240v single phase	2.2KW
2200SVW	2200 psi./150 bar	14 lpm.	415v three phase	4.0KW
Dimensions				
Length: 600 mm Width: 900 mm Height: 1250 mm Weight 140 kg.
