

# Mistral Power Washing Equipment

## STATIC POWER WASHERS

These machines are designed to prevent unauthorised use and theft.

They are lockable and bolted to the ground so can be safely fitted in car parks, forecourts, factories garages , etc.

Mounted in a free standing, frost protected, lockable steel cabinet, they are the perfect answer for busy areas, where some people are authorised to use the wash and others are not.

All the settings for the machine are locked inside the cabinet, together with the detergents.

The machine can be controlled by the operator either to choose how much time he or she wants chemical or high pressure rinse, or the whole process can be automated to give a sequence wash, by pressing one button.

These machines are tailor made for each customers requirements, and are available as hot or cold water washers, with manual or automatic operation, and can be initiated by either button, token, coin, or keypad.

The high pressure 3 plunger slow running pumps, have a conventional crankshaft running in an oil bath and are fitted with ceramic pistons and stainless steel valves to ensure a long trouble free life.

Technical Specification					
Model	Type	Power	Flow	Voltage	Motor
<b>1500CS</b>	Cold Water	1500 psi./100 bar	13 lpm.	240v single phase	2.2KW
<b>2200CS</b>	Cold Water	2200 psi./150 bar	14 lpm.	415v three phase	4.0KW
<b>3000CS</b>	Cold Water	3000 psi./200 bar	15 lpm.	415v three phase	7.5KW
<b>3000CSX</b>	Cold Water	3000 psi./200 bar	30 lpm.	415v three phase	11KW
<b>1500HS</b>	Hot Water	1500 psi./100 bar.	13 lpm.	240v single phase	2.2KW
<b>2200HS</b>	Hot Water	2200 psi./150 bar	14 lpm.	415v three phase	4.0KW
<b>3000HS</b>	Hot Water	3000 psi./ 200 bar	15 lpm.	415v three phase	7.5KW
Dimensions					
Length: 600 mm    Width: 900 mm    Height: 1250 mm    Weight 150-200 kg.					

Add an "M" to the model for mild steel cabinet or an "S" for stainless steel - e.g. "1500CSS"  
A separate diesel fuel tank is required for the hot water machines.

### Supplied with:

- Hand gun and 900 mm insulated lance
- 9 meters / 30 feet of high pressure hose fitted with quick release connections
- Detergent injection system.
- The system has Autostop which switches the machine off after 2 minutes if left unused.

### Optional Equipment:

Additional brush lance. Overhead booms. Keypad operation. Token operation ( up to 3 preset programmes) or "Buy time" which lets the operator use the machine in any mode for a set amount of time.
